Task 1: Open Instagram's home page in Chrome, right-click on a post image, and use Inspect Element to find the exact HTML tag and CSS class used for the image container. Write down the tag name and class.

1. **HTML Tag:** div
   CSS Class: _aagu
2. **HTML Tag:** img
   CSS Class: x21d xuf603 x1016tqk x1y x87ps6o xh8yej3

Task 2: Create a simple HTML file named myprofile.html that displays your name, a short bio, and a profile picture using appropriate HTML tags (h1, p, img). Open it in your browser and view the result.

Tasks 3: Use Chrome DevTools to change the background color of your name (in myprofile.html) to any color you like, live in the browser, without editing the HTML file.

Task 4 : Draw a diagram or write a list showing the DOM structure (parent-child relationships) of your myprofile.html page. Include at least 3 levels (html > body > your content).

1. html

- head
    1. title — My Profile
    2. style
        - .card
- body
    1. div — class="card"
        - img
            - src — Profile picture
            - alt — My Profile Picture
            - width — 200
            - height — 200
        - h1
            - Parth Panchal
        - p
            - Hello! My name is Parth Panchal. I am a Tops student interested in web development and learning new technologies.
